

The Outdoor Collection FAQ's

What are the main benefits and advantages of Caesarstone Outdoor surface technology?

Caesarstone Outdoor has excellent weather enduring properties, enabling use in outdoor environment without damaging its performance, functionality or appearance. These surfaces' original color endure over time. They also withstand variable temperatures and conditions such as extreme heat and cold, snow and rain. The surfaces are durable, non-porous, stain resistant and require no special maintenance treatments or cleaning agents.

What is unique about Caesarstone Outdoor technology?

Caesarstone developed a special resin (patented technology) that has superior outdoor performance, allowing us to launch the most advanced outdoor product in the market, Caesarstone Outdoor.

Can regular Caesarstone be used outdoors?

Although quartz material is durable and weather resistant, Caesarstone's regular surfaces are made with a resin that is relatively sensitive to UV, therefore if installed outdoors, their color will change over time.

Can Caesarstone Outdoor withstand outdoor environmental conditions (UV, temperatures, freezing, rain, etc)?

Caesarstone Outdoor surfaces are designed to withstand weather conditions across the North America and built for temperatures ranging from -13°F to 122°F (-25°C to 50°C). They endure seasonal variances including UV irradiance, high temperature, long water exposure, freezing conditions and more. After conducting thorough testing to ensure consistent results, we have proven that there is no significant change in the surface performance or appearance after years of exposure to all weather conditions.

What colours are available in the Caesarstone Outdoor Collection?

Caesarstone Outdoors are available in three colours. Palm Shade (515) brings the classic look of white marble, Clearskies (406) is a beton grey and Midday (405) has a tinted white concrete base.

What are the dimensions and thickness of a Caesarstone Outdoor surface?

A Caesarstone Outdoor surface is 56½" X 120" and 2 cm. thick.

Do I have to apply a sealer or protective layer to the surface?

No. Caesarstone is a non-porous surface, so you will never have to apply a sealer to any Caesarstone surface.

How can I care for and maintain my Caesarstone Outdoor surface?

Caesarstone Outdoor can be cleaned very easily with water and soap or with a neutral cleaner. Avoid using abrasive reagents or aggressive cleaning agents. Use a simple cloth or microfiber cloth for cleaning and avoid using an abrasive sponge. It is recommended to cover the countertop when not in use.

Can Caesarstone Outdoor be used for an indoor kitchen?

Yes. Caesarstone Outdoor can be a great indoor countertop.

Can Caesarstone Outdoor be used for flooring?

Caesarstone Outdoor slabs are recommended for countertops and backsplashes only.

Can I cut, chop, craft directly on Caesarstone Outdoor surfaces?

Caesarstone surfaces are highly scratch resistant, however, avoid using sharp objects such as knives or screwdrivers directly on the surface. Using a cutting board is always recommended.
