Rugged Concrete™ 4033

Full slab visual appearance examples

This rich, complex, technologically advanced surface offers a compelling tactile effect, while still retaining a smooth profile that is inviting to touch. Caesarstone's Rough finish has a distinctive, courser look with low light reflection, inspiring a modern industrial vibe. Due to the nature of the surface design, it is recommended that common household spills like liquid droplets and rings are dried immediately. Additional care and maintenance will be required.

Our Rough finish is designed to reflect the authentic patinas of industrial materials, the variations in appearance capture real depth and movement, revealing different qualities that make each slab distinct. Applications featuring multiple slabs will experience inherent visual differences.

Because of the unique properties, our website images are not fully representative of the surface. When considering this finish, please order a sample or view a full slab at a retail location.
